SMART WATER BOTTLE

HIGH POWER
UVC-LED
LAMP BEADS

FDA CE FC
RoHS UK

Instructions

Touch the screen for operation:
1. Click to wake up the screen when the screen is resting.
2. Double click to start the 90-minute alarm clock.
3. Press and hold for 8 seconds to switch the temperature display unit (°C/°F).
4. Press and hold for 2 seconds to start UV sterilization.

The water cup icon appears in the upper left corner, indicating that there is an ongoing alarm clock timing. When the timer is over, there will be a buzzing alarm to remind you to drink.

*F and °C can be switched freely, the icon will change accordingly, and only integers will be displayed.

The UV icon appears, and the 180 seconds timer starts, indicating that the sterilization mode is entered. Do not open the cap at this time.

Parameter
